

Red

Smoothfaced/Sandfaced

Perhaps, the best known and most widely used natural colour produced from Etruria Marl. Ideal for matching and repairs, the traditional red Smoothfaced single camber tile is widely stocked by roofing merchants throughout areas where clay tiles are established. Red Sandfaced tiles give a softer appearance, and are chosen more frequently in the South.

Below: Private House Monmouth
Red smoothfaced tiles with bands of ornamental tiles provide an effective contrast to the stonework.

Below: Roding Valley High School, Loughton, Essex.

This red sandfaced roof complements the buff and red brickwork. The large expanse of roof is broken up by the use of 5 bands of ornamental tiles, in alternating courses of club and fishtail tiles. The roof is topped with 2 hole ornamental ridges.
